

# Anna Yushchenko, ui/ux designer, contacts: [annayushch@gmail.com](mailto:annayushch@gmail.com), [annayushch.com](http://annayushch.com), [@annayushch](#)

---

## Summary

I'm looking for a design-driven company where I can create, improve, and maintain products with contemporary UI and fluent UX.

Focus and tidiness. I make lists to keep track of the life flow. Being a perfectionist, I'm open to new ideas. Live in design and see it in everything. Designing myself, I travel, take pictures on film, collect [vinyl](#) and [interesting links](#), do TRX and functional training. Currently learning HTML, CSS, basic Javascript to build what I'm designing and understand how things work behind the scenes.

## Core Skills

- Visual Design
- User Experience Design
- Sketching and Wireframing
- Prototyping
- Researching
- User Interface Design
- Responsive Design
- iOS and Andriod Apps
- Branding

## Soft Skills

- Have the clear understanding of the full design process. From the research to a final visual design and its further development
- Can explain the logic behind my decisions and how the problems are being solved
- Handle human and data errors
- Understand behavioral psychology and view the product in business and strategic dimensions
- Efficiently manage time and able to prioritize multiple projects while fulfilling deadlines and expectations
- Thrive on the inspiration and creativity that comes from being the part of a close-knit team

## Tools

- |            |             |
|------------|-------------|
| - Sketch   | - InVision  |
| - Figma    | - Readymag  |
